

C))LOG®

CHEMOTHERAPY

biolog))id

Connecting healthcare to empower people

C-LOG®

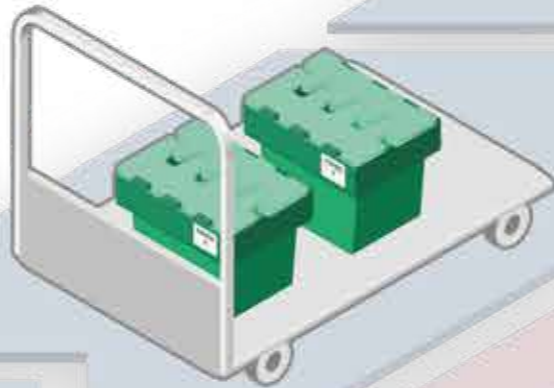

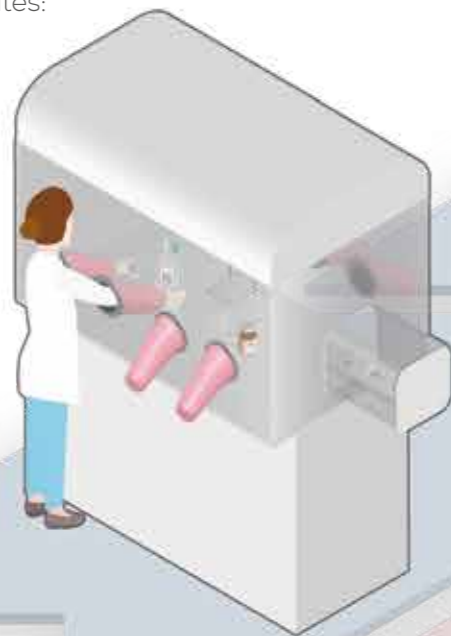

- A solution developed to **optimise the chemotherapy circuit** and keep it **safe and secure**
- A simple and smart technological response that **improves and secures a standard practice**
- A **flexible solution** suited to **all establishments** providing injectable chemotherapy

TRANSPORT

- Records departures from compounding unit and arrivals at nurses stations
- Eliminates any routing errors
- Products status updates: collected, delivered

COMPOUNDING UNIT

- Enables multiple dispensing through simultaneous reading (up to 20 products)
- Provides real-time information to logistics and nurses stations
- Safely manages returns and reallocations
- Products status updates: prepared, dispensed

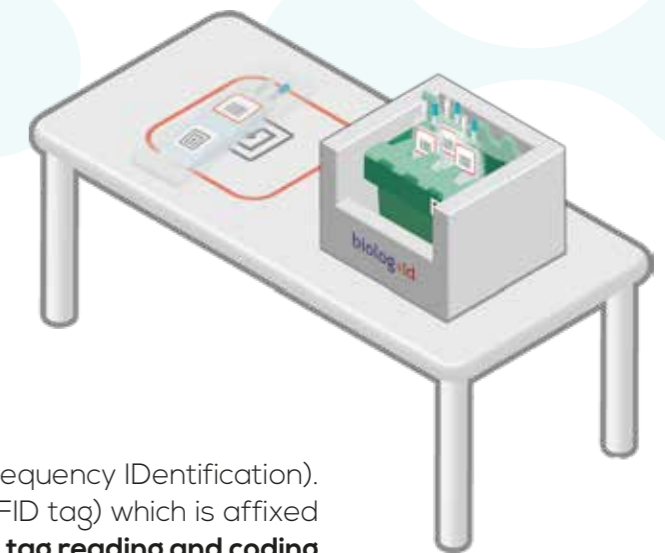

NURSES STATION

- Monitors the status and delivery of preparations in real time
- Automates acceptance checks
- Schedules preparations returns
- Products status updates: received, not-administered, to be returned

PATIENT BEDSIDE

- Ensures compliance with the "5 rights" at the patient's bedside and real-time tracking with the X-Match module
- Tracks the progress of administration at all times
- Products status updates: administration in progress, administration complete

C-LOG® relies on **RFID technology** (Radio Frequency Identification). The solution combines an **electronic label** (RFID tag) which is affixed to each chemotherapy preparation, **tag reading and coding equipment** placed at strategic points along the chain and a **software suite** comprising 4 modules.

Enhanced Traceability & Safety
Process optimisation, Efficiency, Time Savings
Cost Management

C-LOG® guarantees efficiency and safety by connecting you with information that matters.
